GROUP 3600

Sir:

Applicants submits this statement in support of its Supplemental Response to Notice of Abandonment Mailed March 29, 2001 in the above-identified application.

Applicant received a Notice of Abandonment indicating abandonment due to "Applicant's failure to timely file new formal drawings as required in the Notice of Allowability." However, Applicant discovered the request for corrected formal drawings had been made in a Notice to File Corrected Application Papers mailed March 11, 2003.

The undersigned believes that the Notice to File Corrected Application Papers apparently mailed March 11, 2003 was never received.

When an office action requiring a response, including a Notice to File Corrected Application Papers, is received from the U.S. Patent Office by our office, the due date for responding to the office action is entered into our computerized docketing system. This information is entered using the Attorney Docket Number identified on the office action. The office action is subsequently routed and physically placed into the corresponding application file.

Applicants' representative encloses a copy of the docket record corresponding to the above referenced application. If the allegedly mailed Notice to File Corrected Application Papers was received, the docket record would indicate a due date for formal drawings, the typical response to a Notice to File Corrected Application Papers. The enclosed docket record copy does not show a formal drawings due date, thus indicating that the Notice to File Corrected Application Papers was not received from the U.S. Patent Office. Applicants' representative has searched the respective file and can find no indication of the allegedly mailed Notice to File Corrected Application Papers therein.

Not knowing of the Notice to File Corrected Application Papers, Applicant did not respond thereto. This statement is signed by Applicants' representative, B. Noël Kivlin, and our firm's docket paralegal, Sonie Nasabee.

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made that the knowledge that willful false statements in the like so may are punishable by fine, or imprisonment, or both, under § 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity

of the application, any patent issuing thereon, or any patent to which the verified statement is directed to.
